## Environmental Management Policy

**eco|International** commits itself to pollution prevention through responsible management and environmental solutions in order to minimize the impact of obsolete electronic products on the environment.

**eco|International** further commits itself to providing and maintaining safe working conditions, and to follow operating procedures that will safeguard all employees.

**eco|International** will operate and commit to an Environmental Management System (EMS) in conformance with the requirements of the ISO 14001 standards. This system includes setting measurable objectives and targets to its environmental aspects, implementing appropriate environmental control programs and procedures, and continually monitoring and auditing all aspects of the EMS to measure our progress and plan for continual improvement while maintaining compliance with Environmental, Health and Safety laws, regulations and any other requirements identified by the company.

It is the responsibility of everyone within our organization to strive towards continual improvement of our Environmental Management Systems by supporting our EMS goals and targets and following programs and practices of responsible management of electronic products.

We continually review our policy, communicate it to all employees and make it available to the public.
